

Theodore G. Davis Middle School is partnering with Charles County Public Libraries (CCPL) for a summer reading challenge. This summer you will be working on the challenges offered by CCPL. You can choose to work on these challenges through the computer website, [ccpl.beanstack.org](http://ccpl.beanstack.org), the **Beanstack mobile app**, and your **local library branch**. You can also complete the Summer Reading Program with this information attached, if you would prefer.

If you choose to complete it through the computer/library, you can have your Beanstack reading, writing and activity logs sent to your teacher's email. Or, you can print out a copy of your completed challenges, reading logs and activities from the library at the end of the summer, before you return to school.

If you choose to complete the packet, make sure you mark the appropriate items and **return the packet to your ELA teacher by September 6, 2019.**

The CCPL summer reading challenge is all about earning badges. You can earn badges in several categories and for different reasons. You can earn badges for logging minutes read over the summer, for writing reviews, or for completing a challenge. For those of you completing the badges on-line you will be creating an account with your library card and logging these things yourself. Once you have earned 50 points (the halfway mark) you can go into your local CCPL library branch to receive a prize for your hard work.

Theodore G. Davis Middle School challenges you to complete as many badges/challenges as possible by September 6, 2019. **One of the challenges must be completing one middle school appropriate book.**

Here's to a great summer!

## Star Stories (Writing Challenges)

(Fill in stars to match your level of enjoyment 1 star- not so good, 5 stars- great book)

Title of the book:

---

Review:

Title of the book:

---

Review:

Use additional paper for the following activities:

- Write a paragraph (50+ words) about your view on life outside of Earth
- Write a paragraph (50+ words) about a first-hand experience observing the first moon landing. \*The 50th anniversary is July 19, 2019!!\* You may write about your own experience, or ask a friend or family member to tell you about theirs.
- Write a paragraph (50+ words) about your view if Pluto should be considered a planet
- Write a review of your favorite space themed book or movie.

**Total points for Star Stories challenges:** \_\_\_\_\_

### Reading to the Moon (Reading challenges)

- Read something that won an award.

Title of the book:

---

- Read up on the animals who became astronauts

Title of the book:

---

- Read a book set in the future

Title of the book:

---

- Read a biography on an astronaut

Title of the book:

---

- Read up on the women who helped with space exploration

Title of the book:

---
