

# ***Make your Own Clock!***

**1<sup>st</sup> Grade- Tell time on the hour and  $\frac{1}{2}$  hour**

**2<sup>nd</sup> Grade-Tell time to the nearest 5 minutes**

**3<sup>rd</sup> Grade- Tell time to the nearest minute.**

**Parents,**

**This is one of those math skills that hasn't changed! Help your child make their own clock and then use the standards above to help them learn how to tell time.**

**Show them different times and have them tell you what time it is, and tell them a time and have them show it on the clock.**

**If you have an analog clock at home-stop a couple times a day and have them tell you the time.**

**For older kids-start asking them questions about start time, end time, and elapsed time when given two of those pieces of information.**

**This is definitely a skill that kids can easily see the importance of learning.**
