

Tens Frames

This useful tool is great way to help build understanding of our base ten system. Fill up the boxes to help count, add, and subtract. Use everyday objects (beans, Legos, or different colored pieces of paper) or draw in the tens frames.

- Start in Pre-K with a 5s frame by filling it from left to right.
- In K-1, use single or multiple tens frames. Fill from left to right, top then bottom.
