

Split View for iPads

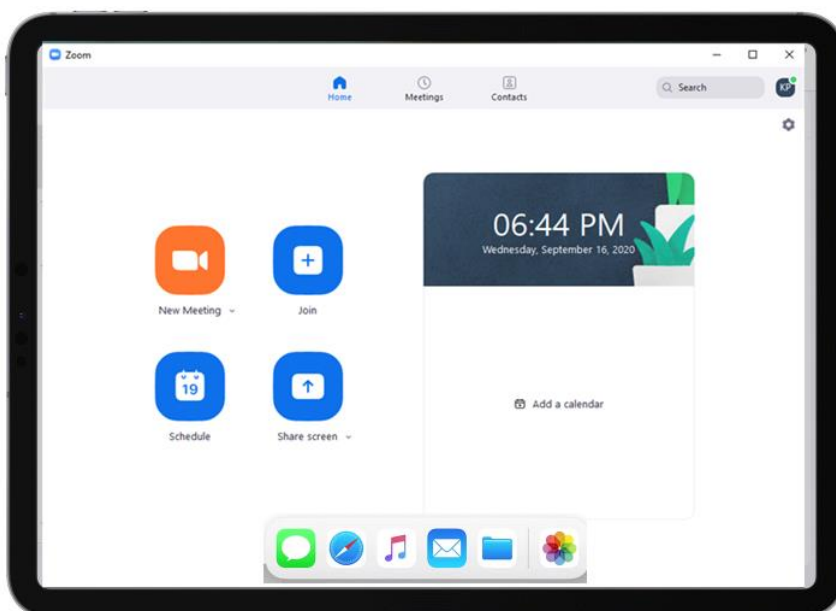

With Split View, you can use two apps at the same time. For example, you can view StudentVUE or FastTest while still viewing your Zoom class.

How to use Split View:

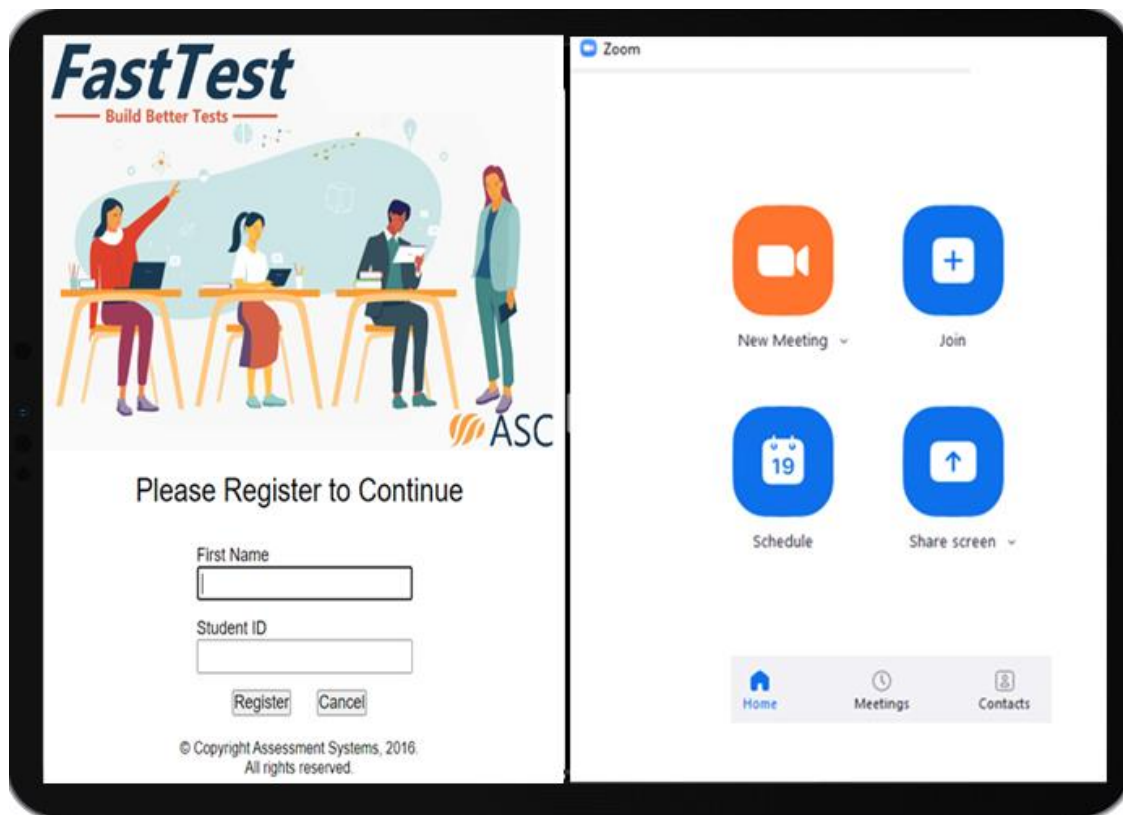

1. Open an app.

2. Swipe up from the bottom of the screen to [open the Dock](#).

3. On the Dock, touch and hold the second app that you want to open, then drag it off the dock to the left or right edge of the screen.

How to adjust Split View:

- To give the apps equal space on the screen, drag the app divider to the center of the screen. If students are taking a FastTest assessment with a split screen that shows passages and question, you can make the Zoom window smaller so the text is easier to read.
- To turn a Split View into a Slide Over, swipe down from the top of the app.
- To close Split View, drag the app divider over the app that you want to close.
